

Adding LibGuide Content in Blackboard

In Blackboard

Go to – **Build Content**

Select LibGuides

From the drop-down menu select
LibGuides

The screenshot shows a web interface with a 'Weekly Content' dropdown menu. The menu is open, displaying two columns of options. The 'Build Content' tab is active. In the left column, 'LibGuides' is highlighted. In the right column, 'New Page' is selected. The background shows a partial view of a page with text like 'It's tir' and 'Use fun'.

Permit Users to View this Content ☒ Yes ☐ No

Track Number of Views ☐ Yes ☒ No

Select Date and Time Restrictions

☐ Display After

☐ Display Until

Add Name

Name the content to be what you will be linking to.

For example, if linking to the APA Citation LibGuide we suggest naming this content "APA Citation Library Guide" or something similar that describes the content to the student.

You will select Submit in the bottom left corner to create the content as you normally would.

Content Created

You will see your content listed. Click on the link to locate the library content.

Select Content Type

You can select Guides and Guide Content or A-Z Databases. Based on what you select, your options will change to be more specific for a content box versus a full guide.

Adding a LibGuide

Use the drop-downs below to select the content you wish to display when students click on the link. After selecting an option from the first dropdown, additional selections options will appear. This selection screen will not appear again once you have made your selection.

LibGuide Embedded

Now the LibGuide displays directly within Blackboard and the student remains within the LMS. Note that the Librarian chat box also displays and can be used directly on the page.

Your Question*

Why Evaluate a Source?

When conducting a search for information, students can become overwhelmed by the amount of information available. **We're here to help!**

It is important to determine the quality of information prior to incorporating it into an assignment by asking and answering a few questions:

- Is the information accurate?
- Is the information source reliable?
- Is the information current?
- What does the author want me to feel or believe when reading the information?

The **TRAAP Test** can help you answer these important questions!

What is the TRAAP Test?

It simple set of guiding questions to help you determine if the information and/or sources is/are closely related to your topic and meet the project requirements of your professor.

Your specific research needs will determine which criteria is important.

For example, a professor may require primary sources, peer-reviewed articles published within the past 5 years, or use a book related to the subject.

Strategies to Evaluate Sources

Here is a list of useful strategies to use to ensure the sources you use for assignments are reputable and factual!
